WALK-IN UNITS

FEEDGROW
INTERNATIONAL PTY LTD
"FARM IN A BOX"

BUILT FOR SCALE. DESIGNED FOR OUTPUT.

FEEDGROW® "Farm in a Box"® also manufactures a range of walk-in units, designed for **scalable fodder production**.

These units are ideal for farmers looking to increase daily feed output, improve efficiency, and **expand operations without increasing land usage**.

Designed for continuous daily feed production.

Scalable Output

Increase production capacity without expanding infrastructure.

FEEDGROW® Patented Climate Control Technology

Precision-controlled environment for maximum yield consistency.

High Volume Production

Designed to support large-scale daily feed output.

Modular Design

Expandable and adaptable to different farm sizes.

DAILY PRODUCTION.

Fresh feed, every day

RIISING COSTS.

FEEDGROW® PUTS YOU
BACK IN CONTROL.

LESS DEPENDENCY
on external suppliers

GREATER CONTROL
over rising costs

MORE PREDICTABILITY
in your operations

FEEDGROW® gives farmers full control over feed production by producing high-quality fodder directly on-site reducing reliance on external suppliers and ensuring consistent, predictable output every day.

FEEDGROW® IS HOW YOU BEAT RISING COSTS.

FEEDGROW® systems are engineered for performance.

Our specially designed trays are manufactured using advanced injection moulding technology and high-quality materials, ensuring durability and optimal plant growth.

FEEDGROW® "Farm in a Box®" and the Leaf Logo are registered trademarks.

We are the only producer in South Africa with a proven track record, backed by scientifically tested results and internationally verified nutritional values.

Unlike imitations, FEEDGROW® is not a converted shipping container.

Every unit is built using patented components and our exclusive Clima-Tech® climate control system, delivering precise temperature regulation and consistent daily output.

Barley seed availability is guaranteed **all year round for FEEDGROW® clients.**

THE DIFFERENCE IS CLEAR.

☒ Purpose-built, engineered system. ☒ Clima-Tech® climate control. ☒ Consistent, high-quality daily output. ☒ Designed for optimal feed growth. ☒ Proven results across South Africa.		☒ Converted or makeshift containers. ☒ No climate control precision. ☒ Inconsistent, poor quality output. ☒ Limited feed growth potential. ☒ Unreliable and unproven results.

100% AUTHENTIC
THE ORIGINAL. THE PROVEN.

TRUSTED BY FARMERS
ACROSS THE WORLD.

DON'T BE MISLED BY IMITATIONS
NOT ALL SYSTEMS ARE BUILT THE SAME.
